#### ■ ENVIRONMENT CHARACTERISTICS

| CONDITIONS   | STANDARDS   |  |
|--|---|--|
| High and low temperature   | Sensitivity shall not change by more than         |  |
| (from-40 $^{\circ}$ C to +80 $^{\circ}$ C at a relative humidity of 30%)                     | 30% all of the conditions.                        |  |
| Humidity of 10% to 90%   |   |  |
| at the temperature of 25°C   |   |  |
| Storage at +85 $^\circ\!\mathrm{C}$ for 96 hours and at -40 $^\circ\!\mathrm{C}$ for 96hours |   |  |
| followed by a normalization period at 25°C. As shown in                                      |   |  |
| FIG.3.   | All sensitivity shall be within 30% of the        |  |
| Operation at 95% relative humidity and $40^{\circ}$ C for 100                                | specified values after the device is subjected to |  |
| hours, followed by a normalization period of 24hours at 30%                                  | any or all of the conditions.                     |  |
| and 25°C.As shown in FIG.4.  |   |  |
| Vibration at 10Hz to 55Hz ,1.5mm amplitude. 1 minute   |   |  |
| sweep.   |   |  |
| X,Y,Z,3 each axis for 3 hours. As shown in FIG.5   |   |  |

# **TESTING INSTRUMENT AND CONDITION LIST**

## ■ NOTE:

#### 1. DESIGN RESTRICTION/PRECAUTIONS

- This sensor is designed for use in air environment. Do not use it in liquid.
- In the case where secondary accidents due to operation failure or malfunctions can be anticipated, add a fail safe function to the design.
- In the case where this sensor is to be hold in housing, use soft buffer between sensor and housing. The front convex part of this sensor vibrates in large extension. If this part is hold, its characteristics will vary. The top must be free to vibrate.

#### 2. USAGE RESTRICTION/PRECAUTIONS:

- To prevent sensor malfunctions, operational failure or any deterioration of its characteristics, do not use this sensor in the following, or similar conditions.
  - a) In strong shock or vibration.
  - b) In high temperature and humidity for a long time.
  - c) In corrosive gases or sea breeze.
  - d) In an atmosphere of organic solvents.
  - e) In dirty and dusty environments that may contaminate the sensor front.
  - f) Over specified allowable input voltage(Vp-p)
- Do not solder adding stress on outer lead, also do not apply stress like spin or pressure just after soldering.

In case you form the leads, support the root firmly.

#### 3. WARRANTY:

#### Period

Warranty period is three years after delivery.

Scope

Defective sensors attributable to manufacturer' responsibility shall be replaced for free during the warranty period.

However, following cases are out of the scope.

- a) Unsuitable handling or misuse by user.
- b) Modification or repair by user.
- c) Any other cases not due to manufacturer's responsibility such as natural calamity, accident .etc. This scope covers only replacement.

Any loss derived from failure or malfunction of the sensor, or cost on replacing is excluded from this warranty scope.
